

## Case Study:

# Ending the HIV Epidemic in the Atlanta Metro Area (Fulton and Dekalb Counties)

This resource provides an overview of the HIV epidemic in the Atlanta Metro area and the amount of HIV-related philanthropic funding received by organizations there in 2020. It complements a data partnership between Funders Concerned About AIDS (FCAA) and AIDS Vu, offering a glimpse at what the HIV epidemic looks like in the 57 jurisdictions prioritized in the Ending the HIV Epidemic in the U.S. Initiative (EHE).

As the eighth largest metropolitan area in the U.S., Atlanta is comprised of numerous counties, four of which are prioritized as EHE jurisdictions: Cobb, Dekalb, Fulton and Gwinnett. FCAA's analysis only found funding reaching Fulton and Dekalb counties, with zero funding reaching Cobb or Gwinnett counties. However, it is important to note that this data was analyzed based on the location of an organization's headquarters. As such, while funding may predominantly be received within Fulton County, that funding may also reach and serve organizations and communities in the surrounding counties.

To learn more about the work behind these numbers, please read this feature story with [Dazon Dixon Diallo of SisterLove](#).

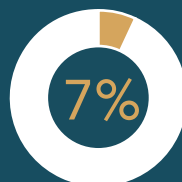

## HIV Philanthropic Funding

In 2020, almost \$60 million – or 19% of HIV-related philanthropy to the US – reached the 57 Ending the HIV Epidemic jurisdictions. Roughly 7% of that funding reached organizations based in Dekalb and Fulton Counties. The majority of that funding (86%) was disbursed to organizations in Fulton County.

In 2020, organizations in Dekalb and Fulton Counties, GA received:

**\$4,029,153**

in HIV-related philanthropy

of total HIV-related philanthropy to the EHE Jurisdictions

## Funding Distribution

22

Grantmakers

73

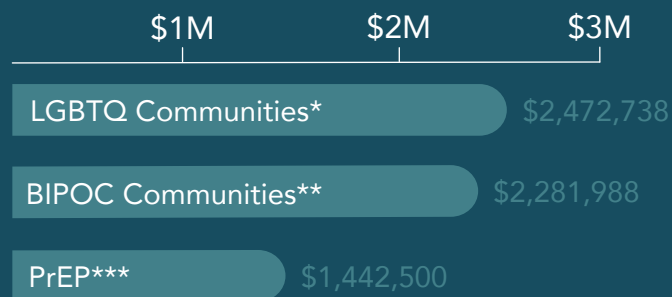

Grants Given

32

## Population and Strategy Spotlight

\* Includes LGBTQ - general, MSM, Transgender

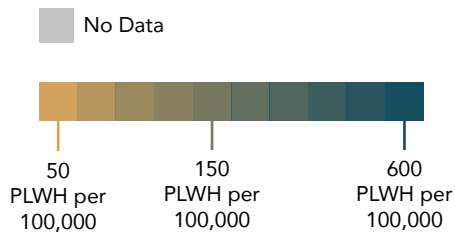

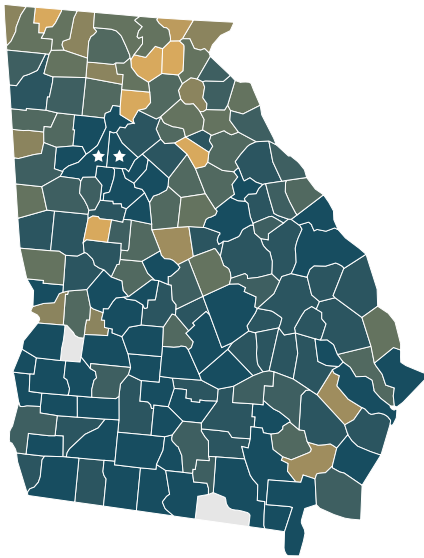

\*\* Includes African American, Latinx, Asian American, Indigenous

\*\*\* Pre-exposure Prophylaxis

## Dekalb and Fulton Counties, Georgia

Dekalb and Fulton Counties in Georgia collectively were home to 24,996 people living with HIV (PLWH) in 2020.

*The epidemiological data presented here has combined totals for the two counties. For disaggregated totals, please visit the individual county profiles on [AIDSVu.org](https://AIDSVu.org).*

**746** new HIV diagnoses in 2020 combined

Roughly **3/4** of PLWH in each county are Black

A collective **24,996** PLWH in 2020

Each county had a rate of HIV **4-5 X** higher than the national rate

**64%** of the combined number of PLWH reside in Fulton County.

## Ending the HIV Epidemic

FCAA has partnered with AIDSVu to provide a snapshot for local philanthropic funders on what the epidemic looks like in their counties, who it's impacting, and how philanthropy is – or is not – responding. Visit the resources linked below to learn more.
